

Reference Guide & Workspace Setup Outline

Overview

This document serves as a basic outline for goals and/or questions that should be answered by the end of the project. Ultimately there should be a way where film, statistics, personnel and scheme all come together to find a model as to finding the most effective teams in college football, and how the phrase “any given Saturday” can apply to certain matchups.

Acceptance Criteria

Section 1: Team Selection

- Team 1: University of Georgia Bulldogs
- Team 2: Alabama Crimson Tide

Section 2: Reference Matchup

- Completed Game: (17) Alabama vs (5) Georgia
 - Date: 09/27/2025
 - Season: 2025 Regular Season Week 4
 - Final Score: Alabama 24 - Georgia 21
 - Venue: Sanford Stadium

Section 3: Core Football Questions

1. How impactful are certain defensive schemes against offensive personnel matchups and vice-versa?
2. What were the most impactful types of plays, scenarios and outcomes of this game and how do they extrapolate over the course of the season?

3. What primary defensive coverage or pressure package dictates their third-down success rate?
4. What real impact does weather have (rain, wind, temperature, wind direction, sun/shadows)?
5. This game (and most games) feature a mix of mobile, scrambling and pocket QBs. What coverages, techniques are used to mitigate these players?
6. Conversely to #5, what formations, offensive schemes and/or player archetypes prove successful to quarterback types.

More questions to come with refinement, this is just a first glance.
